

## WHAT ARE THE MAIN TOPICS?

The summer school will focus on the use of regional resources in the context of sustainable development. It will highlight some geographical processes affecting the use of regional resources. The influence of wider regional and global context on the sustainable use of regional resources will also be addressed. Examples of (un)sustainable use of regional resources from Central and South-Eastern Europe will be presented.

## WHAT DO WE OFFER?

- ▶ 12 days of lectures, seminars, practical work, field seminars/work
- ▶ 5 ECTS for active participation
- ▶ Accommodation in student dorms
- ▶ 296€ of pocket money
- ▶ A tour of Ljubljana
- ▶ 2 full-day field trips (extra charge may apply)

### 9TH INTERNATIONAL GEOREGNET SUMMER SCHOOL

## SUSTAINABLE USE OF REGIONAL RESOURCES

LJUBLJANA  
30. 6. – 12. 7. 2019

## WHO CAN ATTEND?

The summer school is primarily intended for students of master's degree in the field of geography, regional development and regional and spatial planning, but we also welcome undergraduate students from these fields and students of related study programs.
